SUMMARY

Dynamic and Experienced Medical Lab Technician with **4 years of clinical expertise** with bachelor's in biotechnology recognized by WES as equivalent to Canadian Bachelor's degree. I am dedicated to upholding accuracy and precision, boasting a solid record in sample analysis, instrument maintenance and quality control protocols. Recently certified by the **Medical Laboratory Professionals Association of Ontario (MLPAO)**, reflecting my dedication and readiness to excel in medical laboratory professions. Eager to leverage comprehensive technical knowledge to enhance patient care and contribute to advancement in diagnostic medicine with a progressive medical laboratory team.

SKILLS

- Able to work in phlebotomy procedures on various veins including hand, cephalic, basilic, and median cubital. Including skilled in capillary puncture and butterfly venipuncture.
 - Knowledgeable in serum separating techniques to obtain high-quality serum samples for diagnostic testing.
 - Competent in conducting vital sign measurements to assess patient health status and assist in medical evaluations.
 - Proficient in performing electrocardiograms (ECGs) to monitor cardiac activity and detect abnormalities.
 - Familiar with microbiology specimen collection procedures, ensuring proper handling and preservation for accurate analysis.
 - Skilled in blood smear preparation for microscopic examination, including proper staining techniques for cellular analysis.
-

- Experienced in slide staining methods for histological and cytological specimens, ensuring clear visualization and accurate interpretation of results.
- Excellent in customer service.
- Proficient in Microsoft Office Suite (Word, Excel, PowerPoint, Outlook)

INTERNSHIPS

Medical Laboratory Technician –(Internship): Eglinton Health Care centre, Scarborough, ON. March 01, 2024-Apr 30,2024

- Proficiently **collected, label and processed specimen** ensuring accuracy and adherence to establish protocols.
- Lead a cross-functional team in implementing a laboratory safety initiative that reduced chemical spills, showcasing leadership in promoting and enhancing workplace safety culture.
- **Followed strict safety protocols** and procedures to minimize risk of contamination and ensure a safe working environment for oneself and colleagues.
- Demonstrated expertise in performing and interpreting **ECG procedures** efficiently and accurately.

WORK EXPERIENCE

Laboratory Technician- Seven Hills Pathological Laboratory - March 2017 – March 2021

-Operate, calibrate, equipment used in quantitative or qualitative analysis, like Microscope, spectrophotometers, calorimeters, flame photometers, or computer-controlled analyzers.

- Set up, clean, and **maintain laboratory equipment.**
- **Conducting Phlebotomy**, creating logs for patients and **preparing samples** for testing and release results while ensuring the **confidentiality of patient information.**

-Enter data into computer from analysis of medical tests or clinical results such as, Hematological test, Clinical biochemistry tests, Serological tests.

- **Collect blood, urine, semen** to define the number of cells, their morphology, or their blood group, blood type, or compatibility for transfusion purposes, using microscopic techniques.
- **Conducting a wide range** of diagnostic and interpretive specimen testing
- Identify and **implement new ideas**.

H.M. Patel Centre for Medical Care and Education Aug.2016- Feb. 2017

- Conducted diverse laboratory tests including **Hematology, Clinical Pathology, Blood Bank, Biochemistry, Histotechnology, Serology, Microbiology and Cytology**.
- Maintain and **calibrated laboratory equipment** and instrument, ensuring accurate result with a precision rate.
- **Proficiently executed phlebotomy procedures** with precision and compassion, ensuring optimal patient care and sample integrity.
- Perform specimen collection, processing and analysis **adhering to strict quality control measures**, contributing to an increase in overall lab efficiency.
- **Documented and maintained accurate records** of laboratory procedures and test result, facilitating seamless data retrieval and analysis, contributing to an increase in operational efficiency.
- **Implemented rigorous hazardous waste management** procedure with meticulous adherence to safety protocols.

Walmart – CAP 1 Associate

July 2021- July 2023

- To process the merchandising products
- To change the pricing tags
- Capping of the stocks
- Resolve customer complaints, guide them and provide relevant information
- Stocking of the products
- Work as part of a team to strategically plan and execute duties based on workload.

Education

Medical Laboratory Technician/Assistant Oxford College, Scarborough, ON (with Honours)	May 2023- April 2024
National Apprenticeship Certificate (Govt. of India)	Aug 2016 – Feb 2017
Certificate in Medical Laboratory Technology (C.M.L.T)	March 2014- March 2015
Bachelor of Biotechnology	June 2011- March 2016

Certifications:

MLPAO Certificate– Completed	
First Aid and CPR, BLS	Aug 2023-2024
CE Courses Certificates:	
CSMLS – Introduction to Basic Electrocardiography (ECG)
