REGISTERED PRACTICAL NURSE/ MEDICAL LABORATORY TECHNICIAN

PROFESSIONAL SUMMARY

- Greatly value expressing compassion for others, accountability, working collaboratively, and constantly strive to be innovative within the workplace
- Over 2+ years of hands-on clinical experience as a client-centered and ethical Registered Practicing Nurse (RPN), with experience working with multicultural and multidisciplinary teams within a healthcare environment
- 1 year of experience working inside a medical laboratory as a medical laboratory technician, collecting blood and other tissue samples with care and great attention to detail
- Applied specialized training and knowledgeable skills acquired in Neurology/Medicine, Musculoskeletal (orthopaedics), Dialysis & Renal Care, managing a diverse patient load averaging 4-7 clients per 12-hour shifts

CLINICAL EXPERIENCE

Med- Health Laboratories

Medical Laboratory Assistant Intern

April 3- May 1, 2023

- Completely and accurately labeled laboratory specimens according to institutional protocol and procedural requirements
- Delivered and handled specimens in a safe and timely manner, considering specimen priority and stability
- Followed established procedures to prepare specimens for analytical testing
- Demonstrated fundamental knowledge of medical terminology, physiology, anatomy, and disease procedures

LifeLabs

October 2020 – May 2021

Lab Patient Technician

- Collect blood, tissue, and other samples from the patient
- Log patient samples and prepare them for testing
- Conduct routine laboratory tests and sample analyses
- Scanned requisitions into the laboratory computer system
- Performed duties such as health screenings, data entry, collection and labelling of samples, phlebotomy, and electrocardiograms
- Safely stored and handled samples, operated a centrifuge, and prepared slides of blood for testing

Nurse Next Door

Registered Practical Nurse

August 2019 – September 2020

- Passionately provided quality care for patients, including assisting patients with ADL's (activities of daily living) by ensuring patients took their prescribed medication on time
- Provided psychological support such as companionship and encouragement

William Osler Health System - Brampton Civic Hospital

January 2019 – April 2019

Neurology/ Medicine - 400 hours

- Shadowed and worked closely with a team of Supervisors, Specialists, Physicians and Nurses in a busy and fast-paced environment; gained extensive exposure to a wide range of treatment protocols for assisting clients with neurological disorders or injuries
- Applied relevant nursing interventions based on vitals, such as placing a patient in a hypotensive state in the Trendelenburg position
- Practiced safe nursing care with PICC lines (drawing blood and inserting medication) and consistently communicated with the client to offer reassurance and ensure their clear understanding of the procedure
- Safely inserted NG tubes and rectal tubes
- Developed IV insertion and phlebotomy skills to perform whole blood collection procedures; enhanced suction and trachea care skills, and developed CBI (continuous bladder irrigation) set up and monitoring skills
- Performed 24-hour chart checks and MAR checks during night shifts and enhanced skills in admitting and discharging patients

**Southlake Regional Health Centre
Musculoskeletal (orthopaedics) - 130 hours**

September 2018 – December 2018

- Assessed, treated, and monitored patients with musculoskeletal surgical wounds
- Assisted with rehabilitating post TKA (total knee arthroplasty) and THA (total hip arthroplasty) patients
- Developed skills in removing surgical staples
- Practiced safe IV medication administration of narcotics
- Provided complete and competent reports during shift change

**Bridgepoint Active Healthcare
Dialysis & Renal Care - 130 hours**

April 2018 – August 2018

- Further enhanced focused assessments and skills such as wound care and catheterization
- Attained valuable knowledge on how to care for patients with NG and G tubes and how to provide therapeutic nursing care for patients with advanced stage renal disease
- Practiced safe parenteral and non-parenteral medication administration

**Southlake Residential Care Village
Long Term Care – 130 hours**

September 2017 – December 2017

- Developed basic assessments and documentation skills
- Promoted quality of life by focusing on improving skin integrity through routine skin care
- Developed basic wound care skills
